Dear Sir/Madam,

As a well-educated and driven professional with some experience and development with a focus on growth and cutting costs, I believe that I would be a terrific fit for the role.

I have demonstrated analytical skills during university project work and much of my experience has been within a team environment. I am able to take responsibility for my own work as well as being able to demonstrate leadership when required. Meeting deadlines has been a consistent part of my academic and working life and I have learned how to communicate with people in situations that require tact. My academic skills have given me the ability to communicate effectively on paper as well as through presentations.

I have a bachelor's degree in information technology specializing in Information Technology, and I own knowledge of programming languages, technologies, and databases. Using market research, networking, critical thinking, and strategy development, I strive to continuously improve the company's business processes, products, and services.

Besides my desire to constantly improve and learn new things, my main personal qualities are excellent communication and teamwork skills. I know that productive communication is an integral part of my daily work and that a good working relationship with clients and co-workers is imperative to the success of my duties.

I am ready to prove my readiness to become a member of your team.

Sincerely,
Amindi Perera
